## DETAILED ACTION

### *Claim Objections*

1. Claim 1 is objected to because of the following informalities: "a said first access device" in line 6 should delete "a". Appropriate correction is required.

Claim 10 is objected to because of the following informalities: "a said first access device" in line 10 should delete "a". Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 10 and 19 are rejected under 35 U.S.C. 102(e) as being anticipated by Newberg et al. (Pub. No. 2002/0093983).

\* NOTE: the term "adapted to" recited in claims 19-28 are not positively recited claim limitations. Therefore the limitation following the term is not considered the claimed limitation. It is suggested applicant to remove the term. See MPEP 2111.04

- With respect to claims 1, Newberg teaches a method for bandwidth management and sharing in a hybrid wired/wireless local area network (e.g. Fig. 1 shows the wireless network, the method comprising:

reserving bandwidth for at least one of a first access device, a first access point and a first switch (e.g. step 510 in Fig. 1); in response to a communication session associated with said at least one of said first access device, said first access point and said first switch, allocating at least a portion of said reserved bandwidth for use by said at least one of said first access device, said first access point and said first switch (paragraph 13); and utilizing said at least a portion of said reserved bandwidth during said communication session (e.g. the reserving bandwidth is for communication between block 102 and 104 as in Fig. 1).

#### ***Allowable Subject Matter***

4. Claims 2-9, 11-18, and 20-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
